not supported supported

b Programme contributor map

Shared membership is undirected and does not imply regulation

c External TDP-43 event anchors

Published values; no local junction or PSI inference

d Input-capability boundary

Primary input supports expression—not local junction, isoform or PSI testing

	Junction input	De novo inference	Reproducible published extraction
Primary GSE219280 gene-count input	no	no	no
Published C9-spectrum snRNA study	yes	no	yes
Published TDP-43-loss neuronal nuclei	yes	no	yes

e Published C9 event summary

Descriptive author-reported totals; not independently recomputed
